B. Read the following passage carefully and answer the questions. (5 points)

A species is the name for the group of animals that are alike, such as lions and tigers. If a species is endangered, it means there are very few of those animals left in the world. If all the animals in a species die, the species becomes **extinct**. Those animals are gone forever.

The koala is close to being an endangered species, because the koala does not eat whatever it can eat, their number goes down day by day. Koalas are picky eaters and they eat little food. They live in tall eucalyptus trees. Many of these trees are called gum trees. Koalas eat the leaves of those trees. Since there are over 600 different type of eucalyptus trees, the koala should have no problem finding food . But koalas are picky. They only want certain eucalyptus tree leaves to eat. Out of the 600 kinds of trees, koalas will only eat the leaves of about 120 kinds of eucalyptus tree. Some are even pickier than that. The koalas of an area will only eat about four or five kinds of eucalyptus leaves. They prefer to die of hunger than eat the other kinds.
