	Reading Comprehension: Passage (1) Read this short newspaper article on sign language, and answer the questions.  Many people are deaf or cannot hear sounds well. They use sign language. They talk with their hands. Two people with hearing problems can talk to each other. They both use sign language. Sometimes people who can hear also use sign language to talk to them. There are two kinds of hand signs. Some hand signs are for whole words. For example, there is one hand sign for the word love. There are hand signs for different actions, things, and ideas. Some of the signs are very easy, for example, the signs for eat, milk, and house. You can see what they mean. Others are more difficult, for example, the signs for star, egg, and week.  The second kind of hand sign is fingerspelling. In fingerspelling, there is a sign for every letter in the alphabet. For example, to fingerspell the word love, a person makes four different signs. It is much slower, but it is useful for saying words like names and some other words. People can use both kinds of hand signs together.  Each country has its own sign language. For example, American Sign Language (ASL) is very different from British Sign Language. Using sign language is nearly like a dance. The whole body talks. Sign languages are beautiful.  (whole= hand) (Finger= iii)				
	True or False 37. () People with hearing problems can talk to each other with hands. 38. () Every person who uses sign language cannot hear or speak at all. 39. () British Sign Language is the same as American Sign Language. 40. () Fingerspelling is a good method for saying names.
