Reading

I. Reading 1. (3pts.)

You have probably often heard that exercise is good for you, but do you know the reasons why? You may also have heard people talking about stress and how too much stress is bad for you. What you may not know is that some stress is actually healthy.

When we exercise, whatever it is, running, jumping, swimming, riding bicycles, or playing ball, we put our bones, muscles, heart and lungs under pressure. We ask them to work hard. Another way of saying that is to say that we put stress on them. In response, they grow stronger. It's as though all those organs and structures in our bodies are thinking, Wow! If that's the sort of work we're going to be asked to do, we'd better be ready.

Answer the following questions completely.

26. Is stress always bad for our body? _____
27. Why do our organs grow stronger when we exercise? _____
28. Doing exercise keeps you healthy. **True or False?**
29. The type of exercise you do is important because some of the exercises are not good for our body.

True or False?

J. Read the text carefully and answer the questions completely. (3 pts.)

Microbes are really wonderful. They are everywhere! They live all around you, on you and inside you! Microbes are very small, so you can't see them. But don't worry. Some microbe make you sick but most others help you to fight disease. There are many different types of microbes. We don't really know how many there are, but we know that microbes do lots of different things.

Bacteria are really important microbes. They are very small. They have only one cell.

Bacteria can live in any area of the earth. They aren't all bad; in fact you couldn't live without bacteria.

Viruses are among the smallest microbes on the earth, even smaller than bacteria. They are different from bacteria because they cannot live on their own. Viruses need to be inside a living cell to live and grow.

Answer the following questions completely.

30. What do microbes do to our body? _____
31. Why are bacteria important for us? _____
32. Where are the microbes?
- a) They are inside us. b) They are on people. c) They are outside to make us sick. d) They are all over.
33. Viruses are
- a) the smallest kinds of microbes on the moon. b) Smaller than any other living thing.
c) attacking your body all the time. d) inside a living cell to be able to live and grow.
34. Microbes and viruses are different types of bacteria. **True False**
35. Most kinds of microbes are useful for our body. **True False**
