F. Read the following passage carefully, and then answer the questions given below it.

There are many words in English language. It's impossible to count the number of words in a language. Have you ever thought about where English words are from? Did you know many English words come from other languages?

Many basic English words come from old English, such as, England, house, woman, man, child, bird, water and etc. Other English words come from Latin, like, family, number, school, educate. Some English words come from French. For example, hotel and menus are two French words.

Today English is an international language. Thousands of English words come from other languages. Every year hundreds of words come into English from new technology, e.g, the internet, text message, e-mail and so on.

English speakers have "stolen" words from other languages and added **them** to English. Those are known as "loanwords" or "borrowings," which are derived from other languages. The next time you hear one; tell your friends where the word originally came from.

F. Read the following passage carefully, and then answer the questions given below it.

A good dictionary gives the user information about words such as spellings, pronunciations and definitions. It also gives examples of how to use the words in sentences correctly. Therefore, it is essential to know how to use a dictionary. In this passage, we provide you with some helpful tips on how to use a dictionary effectively.

1. Choose the Right Dictionary. There are many different types of dictionaries such as learner's dictionaries, general dictionaries, picture dictionaries, etc. Therefore, first identify your needs. Without choosing the right one you cannot meet your language needs.

2. Read the Introduction. The best way to learn how to use your dictionary effectively is to read its introduction. This section explains issues like how entries are arranged, what information is offered in entries and what abbreviations and pronunciation symbols are used throughout the entries.

3. Learn the Abbreviations. Different types of abbreviations are often used in the definitions for a word. This can be confusing if you do not know what the abbreviations stand for.

4. Learn the Guide to Pronunciation. If you immediately jump into using the dictionary without understanding the pronunciation guide, it can be difficult to figure it out.

5. Read the Guide Words. These are the two words at the top of each page that show the first and last entries on the page. These words will help you find the word you are looking for in the right letter section.

6. Read the Definitions. Once you find an entry, you can find the exact meaning of the word, its pronunciation, part of speech, synonyms, antonyms, and probably its origin.

7. Look for Collocations. Learning the meaning of a single word is not usually enough. Through sentence examples, try to learn 'words in combination' to expand your vocabulary.
